

Smart Kitchen Design Documentation

Project: Smart Kitchen Management System

Overview

A UX/UI design project focused on helping users search recipes, discover meals by ingredients, apply filters, and follow guided cooking through an intuitive mobile interface.

Key Features

- Recipe search by name or ingredient
- Recipe filtering
- Guided cooking experience
- Mobile-friendly interface
- User-centered design

My Contribution

Designed the Cooking Help feature by creating user flows, storyboards, hand-drawn wireframes, and digital wireframes while applying user-centered design principles.

Tools Used

Figma, Balsamiq, Wireframing, Storyboarding, UX Design

Skills Demonstrated

UX/UI Design, Prototyping, Design Thinking, Mobile Interface Design, User Research
